

KIM BRIAN REYES

Quezon City, Philippines | kimbrianreyes4@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFILE

Fresh Information Technology graduate with hands-on production experience across web and mobile platforms, including a document management system, an SMS API platform, and a mobile emergency response system architected end-to-end. Combines strong system-design fundamentals with practical AI integration (OpenRouter, Gemini API) to build adaptive, user-centered software. Seeking a junior developer/engineer role to apply proven execution and cross-functional leadership toward measurable product impact.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Bootstrap 5

Backend & Data: Node.js, PHP, Firebase, Supabase, MySQL, Render

Mobile: React Native, Expo

Tools & Platforms: Git/GitHub, Vercel, VS Code

AI Tools: Claude Code, OpenAI Codex, Gemini CLI

Core Strengths: Problem Solving, System Design, Agile Methodology, Cross-Functional Collaboration

EXPERIENCE

Freelance Web Developer — Crown Equities Inc.

Apr 2026 – Jun 2026

Document Management System

- Architected and delivered a full-stack document management system enabling non-technical staff to independently create and update company content, removing the need for developer support on routine changes.
- Integrated an AI-powered chatbot using OpenRouter models into the client-facing website to automate responses to user inquiries and strengthen client engagement.

Technologies: PHP, JavaScript, Bootstrap 5, MySQL, OpenRouter AI Models

Web Developer Intern — FortMED CMS Website

2025 – 2026

Clinic Content Management System

- Built a responsive content management system enabling non-technical clinic staff to manage website content independently, reducing turnaround time on updates.
- Integrated a conversational AI assistant (Gemini API) and an analytics dashboard (Chart.js) to enhance patient-facing interactions and give staff visibility into site performance.

Technologies: PHP, Bootstrap 5, Gemini API, Chart.js

PROJECTS

SMS API Platform — FMC Messaging API

Mar 2026 – Apr 2026

Front-End Developer

- Developed and maintained front-end features for a production SMS API platform, supporting reliable send/receive messaging workflows for Philippine businesses.
- Designed API-aligned UI/UX patterns in close collaboration with backend and product teams, delivering consistent, responsive interfaces across the platform.

Technologies: PHP, JavaScript, Bootstrap 5, MySQL, RESTful API

ResQC — Mobile Emergency Response System (Capstone Project)

2025 – 2026

Lead Developer

- Directed a cross-functional team of 6+ members through the full lifecycle of a mobile emergency response system, from concept through deployment.
- Architected real-time geolocation tracking and an A*-based route optimization engine to improve dispatch coordination and field visibility.
- Defined technical standards and delegated workstreams across the team, delivering all core system modules on schedule.

Technologies: Expo, React Native, Firebase, Mapbox GL, A* Algorithm, Cloudinary

EDUCATION

Quezon City University, Quezon City, Philippines

2022 – 2026

Bachelor of Science in Information Technology

Gardner College Diliman, Quezon City, Philippines

2020 – 2022

Senior High School Diploma, STEM Strand
